DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-25 drawn to a method of treating a subject having a disorder characterized by unwanted cell proliferation by administering a peptide, classified in class 514, subclass 2.
 - II. Claims 26-35 and 40-43, drawn to a method of treating a subject having an unwanted skin condition, as it reads on increasing TSP-2 activity, classified in class 514, subclass 2 and 44.
 - III. Claim 26-31 and 36-39, drawn to a method of treating a subject having an unwanted skin condition, as it reads on decreasing TSP-2 activity, classified in class 514, subclass 2 and 44 and class 424, subclass 131.1
 - IV. Claims 44-49, drawn to a method of evaluating the risk of a subject for unwanted proliferation, classified in class 435, subclass 6 and 7.1.
 - V. Claims 50-52, drawn to a method of identifying a compound, which may treat a disorder characterized by unwanted cell proliferation, classified in class 435, subclass 7.1.
 - VI. Claims 53-55, drawn to a method of treating a subject having a disorder characterized by unwanted cell proliferation by administering a genetically engineered cell, classified in class 424, subclass 93.2.

The inventions are distinct, each from the other because of the following reasons:

2. The methods of I-VI relate to methods but each method differs in method steps, modes of operation, reagents needed and serve different endpoints and effects. For example, a method of treatment using peptide in differs in mode of operation and method steps from a method of treatment using a genetically engineered cell, evaluating risk, and identifying a compound.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, divergent subject matter, and require different search strategies, restriction for examination purposes as indicated is proper.

Art Unit: 1642

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
